The clients specific requirements
How best to implement a management system for the control of the foregoing.

RESPONSIBILITY

Our main goal is Commitment and transparency in business. Our firm stands against corrupon respect for human rights, workers' rights and welfare.

ICT SOLUTIONS

We provide the following ICT solutions:

- Office Equipment (computers, laptops, projectors)
- Fleet Management / Vehicle Tracking
- Fibre Optic Installation
- Environment Monitoring
- LED Interactive Media Systems
- Video Conferencing System

ENVIRONMENTAL MONITORING SYSTEMS

Environment Monitoring System monitors critical factors like water leak, temperature, humidity, fire, power and much more. It allows user to keep an eye on different devices remotely and in real-time. The monitoring device provides a 24/7 operation where once an equipment fails or a problem arise, it will instantly notify you through SMS and email. Preventing equipment failure, downtime, financial loss, and loss of reputation.

(TM3 Environmental Monitoring System)

Infrastructure is the lifeline for data center and facility. Equipment such as sensors, air conditioning systems, generators, water leak detection system, PACU, FDAS, and UPS needs to operate at their full capacity to ensure uninterrupted operation. If not properly monitored these environmental threats can cause a lot more damage than software or hardware problems.

NETWORKING (LAN AND WAN):

- Cat 5e UTP
- Fibre Optic
- Cat 6eUTP
- Telephone LAN and WAN
- Cisco Products

Just Soft Tech Solutions, as a Wide Area Data Communication Company, has been involved in pioneering what is today an important feature in Wide Area Network (WAN), the integration of Voice, Video and Data. Just Soft Tech Solutions markets and supports an extensive range of products and services.

In wireless communication, we use Solectek Radio equipment, this gives 1ms response time over a distance of 45-50 kilometers. The equipment is near line of site. The company's approach is that of providing a total solution by integrating compatible systems over communication networks. The company is committed to providing workable and cost effective solutions in conjunction with our principle and customers.

Local Area Network (LAN) is a type of network which connects computers of limited geographical range (Probably within a building or a house). In order for connecting computers and devices within a particular network LAN uses either Wifi or Ethernet connection.

Wide Area Network is a network type which provides transmission of videos, images, data and voice covering large geographical areas. It is made up of LAN and(WAN), combinations. In order for carrying out the transmission it gets the help of modems, routers, hubs and switches.

Advantages of Local Area Network
- Resource Sharing
- Software Sharing
- Convenient Communication
- Centralized Data
- Improved Security
- Computer Identification

Advantages of Wide Area Network
- Area Coverage
- Updated Files
- Message Exchange
- Increased Bandwidth
- Assured Uptime

JustSoftTech

Uninterrupted Power Supply (UPS)

Just Soft Tech Solutions is the leading company in UPS service provision. UPS supply, Installation, Maintenance and Repairs are one of the strongest areas of operation of **Just Soft Tech Solutions**. The vast experience our technical team has enables us to attend to any UPS and Inverter problem.

We offer the following services on UPS: Supply, repair and support to the UPS brands below:

- MEISSNER (Eaton) UPS
- APC UPS
- POWER WARE UPS
- Tescom UPS
- Emerson (chloride) UPS

Advantages of Uninterruptable Power Supply (UPS)

- Continuity - Experience no outages to critical equipment like computers
- Consistency - Electronics within a UPS tells it when it needs to work and kicks in alternate power as needed, which eliminates glitches or surges and allows time to safely shut down main systems if and when needed.
- Protection - Safeguards against all the oddities of electricity such as surges, spikes, dips and failure because the UPS essentially senses those things and switches to alternate power before the anomalies cause damage.
- Filter - A line-interactive UPS acts as a kind of filter by refining the power as it comes into the UPS then adjusting its output so that internal systems receive a clean, consistent supply free of abnormalities.

Supplying of Network Accessories

Supplying of Network Equipment

Supplying of Network Switch's Cable

Supplying of Rack Mount Saver

Supplying of Computer & Accessories

Supplying of Desktop Computers

Supplying of PC'S

Supplying of Laptop Batteries & Power Packs

JustSoftTech

Supplying of Stationary Equipment

Supplying of Photocopy Machines

Supplying of Printing Machines

Supplying of Toner Cartridges

CCTV Supply & Installations

Supply & Installation of Access Control Systems

Bolt Lock

3A Access Control Power Supplier

Door Exit Button

RFID Access Control
